Methodology

Latino Decisions completed 5,600 interviews with Latinos with strong turnout histories who reported having already voted, or reported being certain to vote in the November 8, 2016 presidential election. Interviews were conducted either on-line or via telephone with live callers, all of whom were bilingual, and both phone and web interviews were completed in the language of preference of the respondent. Respondents were reached on landline (40%) and cell phones (35%), or invited to complete the survey on the web (25%), between November 2-7, 2016 and interviews averaged 10 minutes in length.

The national sample (N=5,600) carries an overall margin of error of +/-1.8 percentage points. Florida has 800 completed interviews and carries a margin of error of +/-3.5 percentage points. The remaining individual states sampled -- Arizona, California, Colorado, Illinois, New York, Nevada, North Carolina, Ohio, Texas, Wisconsin, and Virginia -- have 400 completed interviews and carry a margin of error of +/-4.9 percentage points.
